the information herein was accumulated over fifty some odd years the collection process started when tv first came out and continued until today the books are in alphabetical order and cover shows from the 1940s to 2010 the author has added a brief explanation of each show and then listed all the characters who played the roles and for the most part the year or years the actor or actress played that role also included are most of the people who created the shows the producers directors and the writers of the shows these books are a great source of trivia information and for most of the older folk will bring back some very fond memories i know a lot of times we think back and say who was the guy that played such and such a role enjoy

colin campbell is renowned for his lucid earlier work the coming oil crisis eight years on events have proved his analysis right now he argues that the oil crisis has come the familiar technical explanation of the crisis is carefully made again essentially that there is no more oil to be found that fact is beginning to manifest itself in heightened competition for the remaining resource which is why america invaded iraq why central asia is in turmoil why oil is persistently priced above 50 barrel and why goldman sachs think 100 a barrel is not too unlikely in the near future the problem of an oil less world is beyond the grasp of politicians they can fiddle

with ideas about renewables or hydrogen but they along with most of humanity have not really grasped that it is the oil economy that enables about a 7 billion world population to be sustained a wholly new world is imminent it is not likely to be very pleasant dr campbell outlines our grim future book cover
